

# Stabox® continuity strip for precast 19B, Ø 10 mm, s 100 mm

Item No. FTSTA19B1010

▶ [more product details](#)

Stabox® continuity strip for precast plants

- The well-known advantages of the Stabox® reinforcement connections can be directly transferred to precast construction
- Depending on the logistical challenges, type of construction (semi-finished or fully finished parts) and on-site installation conditions, additional aspects may arise that should be taken into account during the planning phase
- Stabox® offers numerous design options: In addition to FTSTA products specially adapted to the requirements of precast plants, our standard connections and custom-made products can also be used on a project-specific basis
